Adv. 19-12-25

THE UNIVERSITY OF ADELAIDE.

The council of the University recently made the following appointments:—

Faculty of Medicine.

Lecturers.—In forensic medicine, Dr. R. S. Rogers; in operative surgery, Dr. H. S. Newland; in ophthalmic surgery, Dr. H. F. Shorney; in otology, Dr. R. H. Pulleine; in psychological medicine, Dr. M. H. Downey.

Demonstrators.—In physiology and biochemistry, Miss M. C. Dawbarn and Mr. H. R. Marston; in pathology, Dr. E. R. Gault; in anatomy, Dr. C. S. Mead.

Tutors.—In medicine, Dr. D. R. W. Cowan. Associate Tutors.—Drs. Guy Lendon and A. R. Southwood. In Surgery.—Dr. Malcolm Scott. Associate Tutors.—Drs. Ivan B. Jose and L. C. E. Lindon. In Obstetrics.—Drs. H. Gilbert and R. E. Magarey.

Faculty of Dentistry.

Lecturers.—In Dental Prosthesis—Mr. A. I. Chapman. In Surgery—Dr. B. Smeaton. In Materia Medica and Therapeutics.—Mr. L. W. Trott. In Operative Dentistry.—Mr. P. R. Newling. In General Medicine. Dr. A. R. Southwood. In Dental Surgery and Pathology.—Mr. E. J. Millhouse. In Orthodontics.—Mr. P. Raymond Begg.

Faculty of Law.

Lecturers.—Property, parts 1 and 2, Mr. E. W. Benham. Law of Evidence and Procedure.—Mr. R. N. Finlayson.

Board of Commercial Studies.

Lecturers.—In Accountancy—Mr. E. W. Mills. In Commercial Practice—Mr. C. Harding Browne.

THE UNIVERSITY OF ADELAIDE.

APPOINTMENT OF LECTURERS.

The Council of the University recently made the following appointments:—

Faculty of Medicine.

Lecturers—In forensic medicine, Mr. R. S. Rogers, M.A., M.D., M.S.; in operative surgery, Mr. H. S. Newland, M.B., M.S., F.R.C.S; in opthalmic surgery, Mr. H. F. Shorney, M.B., B.S.; in otology, Mr. R. H. Pulleine, M.B.; in psychological medicine, Mr. M. H. Downey, M.B., B.S.

Demonstrators—In physiology and biochemistry, Miss M. C. Dawbarn, B.Sc., and Mr. H. R. Marston; in pathology, Mr. Miss E. R. Gault, B.Sc., M.B., B.S.; in anatomy, Mr. C. S. Mead, B.A., M.B., B.S.

Tutors—Tutor in Medicine, Mr. D. R. W. Cowan, M.B., B.S.; associate tutors, Mr. Guy Lendon, M.D., B.S., and Mr. A. R. Southwood, M.D., M.S; tutor in surgery, Mr. Malcolm Scott, M.B., M.S.; associate tutors, Mr. Ivan B. Jose, M.B., M.S., and Mr. L. C. E. Lindon, M.B., M.S.; tutors in obstetrics, Mr. H. Gilbert, M.B., B.S., and Mr. R. E. Magarey, M.B., B.S.

Faculty of Dentistry.

Lecturers—In dental prosthesis, Mr. A. I. Chepman, D.D.S.; in surgery, Mr. B. Smeaton, M.B., B.S.; in materia medica and therapeutics, Mr. L. W. Trott, D.D.S.; in operative dentistry, Mr. P. R. Newling, D.D.S.; in general medicine, Mr. A. R. Southwood, M.D., M.S.; in dental surgery and pathology, Mr. E. J. Millhouse, D.D.S.; in orthodontics, Mr. P. Raymond Begg, B.D.S.

Faculty of Law (for 1926).

Lecturers—Property, Parts I. and II., Mr. E. W. Benham, LL.B.; law of evidence and procedure, Mr. R. N. Finlayson, LL.B.

Board of Commercial Studies.

Lecturers—In accountancy, Mr. E. W. Mills, A.C.U.A.; in commercial practice, Mr. C. Harding Browne, A.C.U.A.

A UNIVERSITIES MISSION.

Delegation of Students.

LONDON, December 18.

The Dominions' High Commissioners bade farewell to the British University students' delegation at Canada House prior to starting on its Empire tour. The delegation includes Mr. May (President of the National Union of Students and convener of the Imperial Conference of Students of 1924, at which the tour project originated), Mr. McDonald (treasurer of the International Confederation of Students and President of the Scottish Students' Union), Mr. Molsom (President of the Oxford Union), and Mr. Paul Reed (of the London University) recently returned from South Africa with a similar delegation. The purpose of the mission is to promote university co-operation and camaraderie throughout the Empire. It will leave Liverpool on January 4, spend two months in Canada, and thence voyage by the Aorangi to New Zealand, arriving in time for the inter-'varsity tournament, and a month of debating with New Zealand universities. Thence it will proceed to Australia, and will arrive in England again in June.

Adv 21-12-25

EMPIRE UNIVERSITIES.

PROPOSED UNION OF STUDENTS.

LONDON, December 18.

The Dominion High Commissioners bade farewell to the delegation of British University students at Canada House to-day, prior to their departure on an Empire tour.

The delegation includes Mr. May (president of the National Union of Students, and Convener of the Imperial Conference of Students in 1924, where the project originated), Mr. McDonald (treasurer of the International Conferedation of Students, and president of the Scottish Students' Union), Mr. Molsom (president of the Oxford Union), and Mr. Paul Reed (London University), who recently returned from South Africa with a similar delegation.

The purpose of the mission is to promote University co-operation and camaraderie throughout the Empire. The delegation will leave Liverpool on January 4. They will spend two months in Canada, and thence will travel by the Aorangi for Auckland, where they will arrive in time for the inter-University tournament. They will spend a month, visiting and debating with the New Zealand Universities. Thence they will go to Australia, where the negotiations are not completed. They will return to England in June.

MR. E. L. HAYWOOD

who has been admitted to the Bar. He is a son of Brig. H. J. Haywood (Divisional Commander of the Salvation Army at Bendigo)

News 19-12-25

ADMITTED TO BAR

Seven New Lawyers

ADVICE BY JUDGE

Messrs. L. J. Stanley, J. R. Kearnan, H. N. Tucker, E. L. Haywood, G. C. Harry, and K. C. Duffield, and Miss Pepita C. Saunders were admitted to the Bar at a sitting of the Full Court this morning.

Mr. Acting Chief Justice Poole, Mr. Justice Angas Parsons, and Mr. Justice Napier were on the Bench.

"You have been admitted as practitioners of this court and are now members of an honorable profession," said the Acting Chief Justice. "The admission confers upon you certain privileges which incidentally I hope will be a benefit to you. Primarily those privileges are conferred upon you for the benefit of the community, and they carry with them the burden of seeing that you do not use them for any other purpose than that for which they are intended. To help you in your careers you have not merely the law, but the high traditions of a great profession and the example of distinguished men who have been members of it. If you conform to those traditions and follow these examples you need have no fear that the burden imposed upon you will be too heavy.

JUDICIAL CONGRATULATIONS

"I do not intend to deliver a lengthy homily, but on behalf of my brother judges and myself I congratulate you all. The Bench takes a keener interest in the younger members of the profession than is usually supposed, and few things give us greater pleasure than to see the work of a junior done in a careful and proper manner. The pleasure springs to some extent from the goodwill of the Bench toward the Bar, but it is not altogether altruistic. A careful and learned counsel reduces the amount of work that has to be done by the Bench greatly. By slipshod and careless work it is increased proportionately. I wish you successful careers that I hope will bring emolument and honor to yourselves and profit to the State."

SCHOLASTIC CAREER

Mr. Ken Duffield is a son of Mr. Arthur Duffield (Assistant Secretary for Lands). He was born at Hawthorn in [illegible], and received his early education at Kyre College. He won the open scholarship for St. Peter's College, and passed the senior examination in seven subjects with two credits. He won the John Downer University Scholarship and a Government bursary.

Entering the University as a law student at the age of 17 in 1924, he won the Stow prize and the David Murray Scholarship, and gained them again this year. He was articled to Mr. W. J. Isbister, K.C., on whose retirement from the firm his articles were transferred to Mr. C. W. Hayward.

SERVED WITH MR. DENNY

Mr. Stanley is a son of Mrs. E. L. Stanley, and the late Mr. Laurence Stanley, of Port Pirie, where he was born 22 years ago. He relinquished farming and grazing pursuits to study law. He received his early education at a public school in the Hundred of Pirie, and at the Port Pirie High School.

Subsequently he attended Christian Brothers' College, and the Adelaide University, where he graduated. He served his articles with the Hon. W. J. Denny (Attorney-General).

Mr. Stanley takes a great interest in all sports, and while at college captained the first cricket eleven. He is a keen tennis player and is fond of walking. He is a member of the Adelaide Catholic Literary Society.

MATRICULATED EARLY

Mr. Haywood is a son of Brigadier H. J. Haywood, of the Salvation Army. He was born in Adelaide, where he received his early education. With his parents he went to New Zealand in his boyhood, where he had a distinguished scholastic career. He matriculated at 16 years of age, and won the national scholarship, which entitled him to free tuition at the University.

He came again with his parents to Adelaide and began to study law. His father, who was formerly Chancellor of the Salvation Army in this State, is now divisional commander in Bendigo.

SON OF JOURNALIST

Mr. Harry is a son of Mr. Oscar Harry, whose father was a well known journalist in this State and whose mother will be remembered as Miss Ethel Lohrmann, the charming contralto who used to delight audiences at the popular concerts in the Adelaide Town Hall and in oratorio.

He was educated at St. Peter's College. Mr. Harry was a member of the inter-University debating team which represented this State in Sydney this year.

FINE DEBATER

Mr. Kearnan is 22 years of age and a son of Mr. and Mrs. J. N. Kearnan, of Parkside. He was educated at Christian Brothers' College and was articled to Mr. H. G. Alderman. He passed the primary examination in 1916 in eight subjects with credit in history, and passed the senior examination in 1918 in eight subjects, with credits in English literature and Latin. He was attached to the Education Department during 1919, and stationed at the Parkside School.

Mr. Kearnan is one of the founders of the Adelaide Catholic Literary Society. He was winner of the impromptu speech competition in 1924 under the auspices of the South Australian Literary Societies' Union, and was a member of the law students' debating team during 1924. Mr. Kearnan is also connected with the Repertory Theatre Club and University Dramatic Club.

W.E.A. SUMMER SCHOOL.

The Workers' Educational Association has completed arrangements for a summer school at Mount Lofty from January 2 to 9. The Holiday House has been secured for the purpose. A service will be conducted on Sunday afternoon, when Dr. A. C. Garnett will give an address. There will be four night lectures and two morning lectures. This year tutorial study groups will meet on three mornings. The study groups will be led by Mr. A. L. G. MacKay; economics-psychology by Dr. A. C. Garnett; literature by the Rev. G. E. Hale, B.A.; history by Mr. E. G. Biaggini, B.A. Rambles to study bird life, under Mr. J. Sutton, and geology, under Mr. C. T. Madigan, M.A., B.Sc., have been arranged. Professor T. B. Robertson, Dr. W. Ramsay Smith, Principal E. S. Kiek, Rev. G. E. Hale, Dr. A. C. Garnett, and Mr. A. L. G. MacKay will each give a lecture. In addition, the "home life" of the summer school will be fostered. Rambles, lawn tennis, and other pastimes will be part of the daily pleasure. The aim of such a school is educational and social.

Reg 24-12-25

SCIENTIFIC STUDIES.

From the editor, Professor Walter Howchin, F.G.S., has come to hand volume 49 of "Transactions and Proceedings of the Royal Society of South Australia (Incorporated)." As usual, the volume is bulky and of extreme interest to students of natural science. Its value is much enhanced by 23 beautiful photographic plates, a map in colours, and 62 figures in the texts. The first article is by the editor, and deals with the geological distribution of fossiliferous rocks of Cambrian age in South Australia. Professor Howchin records the results of his extensive researches at Carrickalinga, Sellick's Hill and the Willunga ranges, parts of Yorke's Peninsula, and the Flinders Ranges. Mr. F. W. Whitehouse, M.Sc., contributes a paper on the Rolling Downs fossils collected by Professor J. W. Gregory; and Dr. A. J. Turner discusses "New Australian Lepidoptera." Elaborate notes on the geological structure of Central Australia, including the MacDonnell Ranges, are from the pen of Mr. L. Keith Ward, B.A. He thinks it extremely probable that the glacial deposits of Crown Point are to be grouped with the many similar Australian deposits of permo-carboniferous time; and he says the discovery of fossil evidence in the central region would be most welcome. From the many boreholes drilled to tap the supplies of water in the Great Australian artesian basin it has been found that the Jurassic signs which outcrop in Queensland and the eastern margin of the basin extend westward along the Northern Territory. The sands are found to carry fragments of lignitic material wherever samples have been brought to the surface. Possibly this carbonaceous matter may bring about the reduction of sulphates to sulphides, with consequent precipitation of pyrites. It is not yet possible to establish a close correlation of the oldest sediments of the MacDonnell ranges with the formations of the region to the south and east of the Musgrave Ranges. It is now considered that these old sediments with their tillites should be more properly classified as upper pre-Cambrian. Mr. Ward expresses views that differ from those recorded by others who have dealt with the geology of Central Australia. Professor F. Wood Jones describes a new Australian dormouse opossum. Professor Chapman and Sir Douglas Mawson supply notes, "on certain South Australian fossiliferous terrestrial formations of recent age." A dental anomaly in the skull of an Australian aboriginal is the subject of a paper by Dr. T. D. Campbell. Mr. J. M. Black covers some additions to the flora of the State, and Professor T. G. B. Osborne is the author of papers on the flora and fauna of Nuyt's Archipelago and the Investigator Group, and the vegetation of arid Australia. Other papers are by Professor J. B. Cleland, Dr. R. S. Rogers, and Messrs. C. T. Madigan, A. R. Alderman, L. Glauert, A. C. Broughton, J. P. H. Biddle, H. M. Hale, Paul S. Hossfeld, Arthur M. Lea, and Iris E. Robertson.

News 24-12-25

TO LECTURE MEDICAL MEN

American Doctor Coming

TREATMENT OF DISEASES

FREMANTLE, Today.

Dr. Henry Harrower, of Glendale (California), who is visiting Australia for the purpose of lecturing medical men on diseases caused by internal secretions in the body, arrived by the mail steamer Mooltan on his way to Adelaide. He recently conducted extensive research in this branch of medicine, and has written many books on the subject.

Dr. Harrower said that he decided to take a holiday and tour the world, and at the same time give the benefit of his knowledge to the medical men in the countries he visited. Much was being done at the present time in connection with diseases such as diabetes, developed mental defects in children, and those caused by nutritional disturbances. Touching on the treatment of Dr. Abrahams' disease, Dr. Harrower said that he knew Dr. Abrahams but had no faith at all in his "magic box."

When informed that an attempt was being made to introduce the Abrahams treatment in Queensland Dr. Harrower said that the only parts of the world where it could be expected to be found was in the undeveloped portions where ignorance might cause it to flourish owing to the magic qualities attributed to the box. The Abrahams box was not electrically sound, and such being the case how could it be claimed that it was medicinally sound?

Dr. Harrower denied that a slump was being experienced in Los Angeles. He said it was only a matter of the cessation of tremendous activities caused by the rush to Florida, which was booming greater than California ever did.

After spending about a month in eastern capital cities Dr. Harrower will return to America by way of New Zealand.
