

believed such distinction as had not been achieved by any of his predecessors or any of those that followed him. And most of them had been won in that court. It was fitting that he should move for the admission of his youngest son. Great responsibility was thrown on the son. It was true that the distinctions of the latter had not been won in the peaceful work of the legal field, although it did not always seem peaceful to those on the bench. (Laughter.) He had had a most interesting career, and hoped that that which was before him would be just as interesting. It was very gratifying to them that another link should have been forged between the Bars of England and South Australia, and between the Royal Navy and the profession here.

New Practitioners.

Dr. Dorothea Pavy, formerly Miss Proude, was the first Catherine Helen Spence Scholar from South Australia, in 1912. In 1913 she went to London to study sociology in connection with her scholarship. In England she published a book entitled "Welfare Work," to which she then Prime Minister (Mr. Lloyd George) contributed the foreword. This book was written by her to qualify for the degree of Doctor of Social Science, which was conferred upon her in 1917. Dr. Pavy holds the order of C.B.E. In 1917 she married Captain Gordon Pavy, then of the 48th Battalion, and returned to South Australia to study law.

Mr. Keith Alexander Laught, was born at Mitcham, 21 years ago, and is a son of Mr. A. V. Laught, of Kingswood. He was educated at Gilles-street Public School, where his grandfather, Mr. C. A. Wittber, was head master. He attended the Unley High School in 1919-20, and from there went on to Scotch College through the agency of a Caledonian Society scholarship. He entered the University in 1924, and became a Bachelor of Law in 1927. He served his articles with Messrs. Johnstone, Olson & Kriewaldt.

Mr. Albert Edward Coran Treloar was born at Parkside, in 1901, and studied at the Unley and Adelaide High Schools. He entered the Federal Taxation Department in 1919, and on its amalgamation with the State department subsequently, he was transferred. In 1925 he was articled to his brother, Mr. J. L. S. Treloar, and he secured his degree in law last December. He is a member of the St. Andrew's Literary Society.

Mr. Edward Leaver is 23 years of age, and attended St. Peter's College for nine years, and represented that school in the inter-collegiate matches in 1923.

Mr. Bernard von Bertouch is the youngest son of Mr. R. P. A. von Bertouch, and is much interested in literary society work. He has represented Y.M.C.A. at tennis.

Mr. Frederick Robert Forgan, who was educated at the Hindmarsh and Adelaide High Schools, and the Teachers' Training College, is 23 years of age. He left the college in 1917, and was a teacher for two years at Moonta, and for three years at Port Pirie schools. He qualified for his degree in March of this year.

Mr. Cecil Ernest Davies was born in Victoria, and after attending various schools in that State and in South Australia, he was a student at Prince Alfred College from 1919 to 1923, when he entered the firm of Bright & Bright. After serving his articles there for five years, he went to Messrs. Holland & Whittington

GRADUATES' ASSOCIATION.

New Professors Welcomed.

Two new professors were welcomed at a well-attended meeting of the Graduates' Association at the Elder Conservatorium on Friday night. They were Professor A. Killen Macbeth, who has been appointed Angus professor of chemistry, which position was rendered vacant by the death of Professor E. H. Rennie, and Professor H. H. Woollard, who has taken the place of Professor Wood-Jones as Elder professor of anatomy. Dr. Harold Davies, who recently returned from England was also welcomed. Mr. E. W. Holden (president of the association) was in the chair.

Professor Macbeth referred to the many avenues in which chemists had employed themselves, and explained how the impoverishment of the soil had been averted by the laboratory, which had also utilized waste products, discovered anaesthetics and antiseptics, and saved the race from starvation. The only things a chemist hesitated to deal with, he declared, were witchcraft and spiritualism.

Professor Woollard said he was born in Victoria and graduated at the Melbourne University. After five and a half years spent in the "dreary and monotonous waste of war," as a member of the A.I.F., he had gone to University College, London, and had afterwards come in contact with many medical schools in Great Britain, the Continent, and the United States.

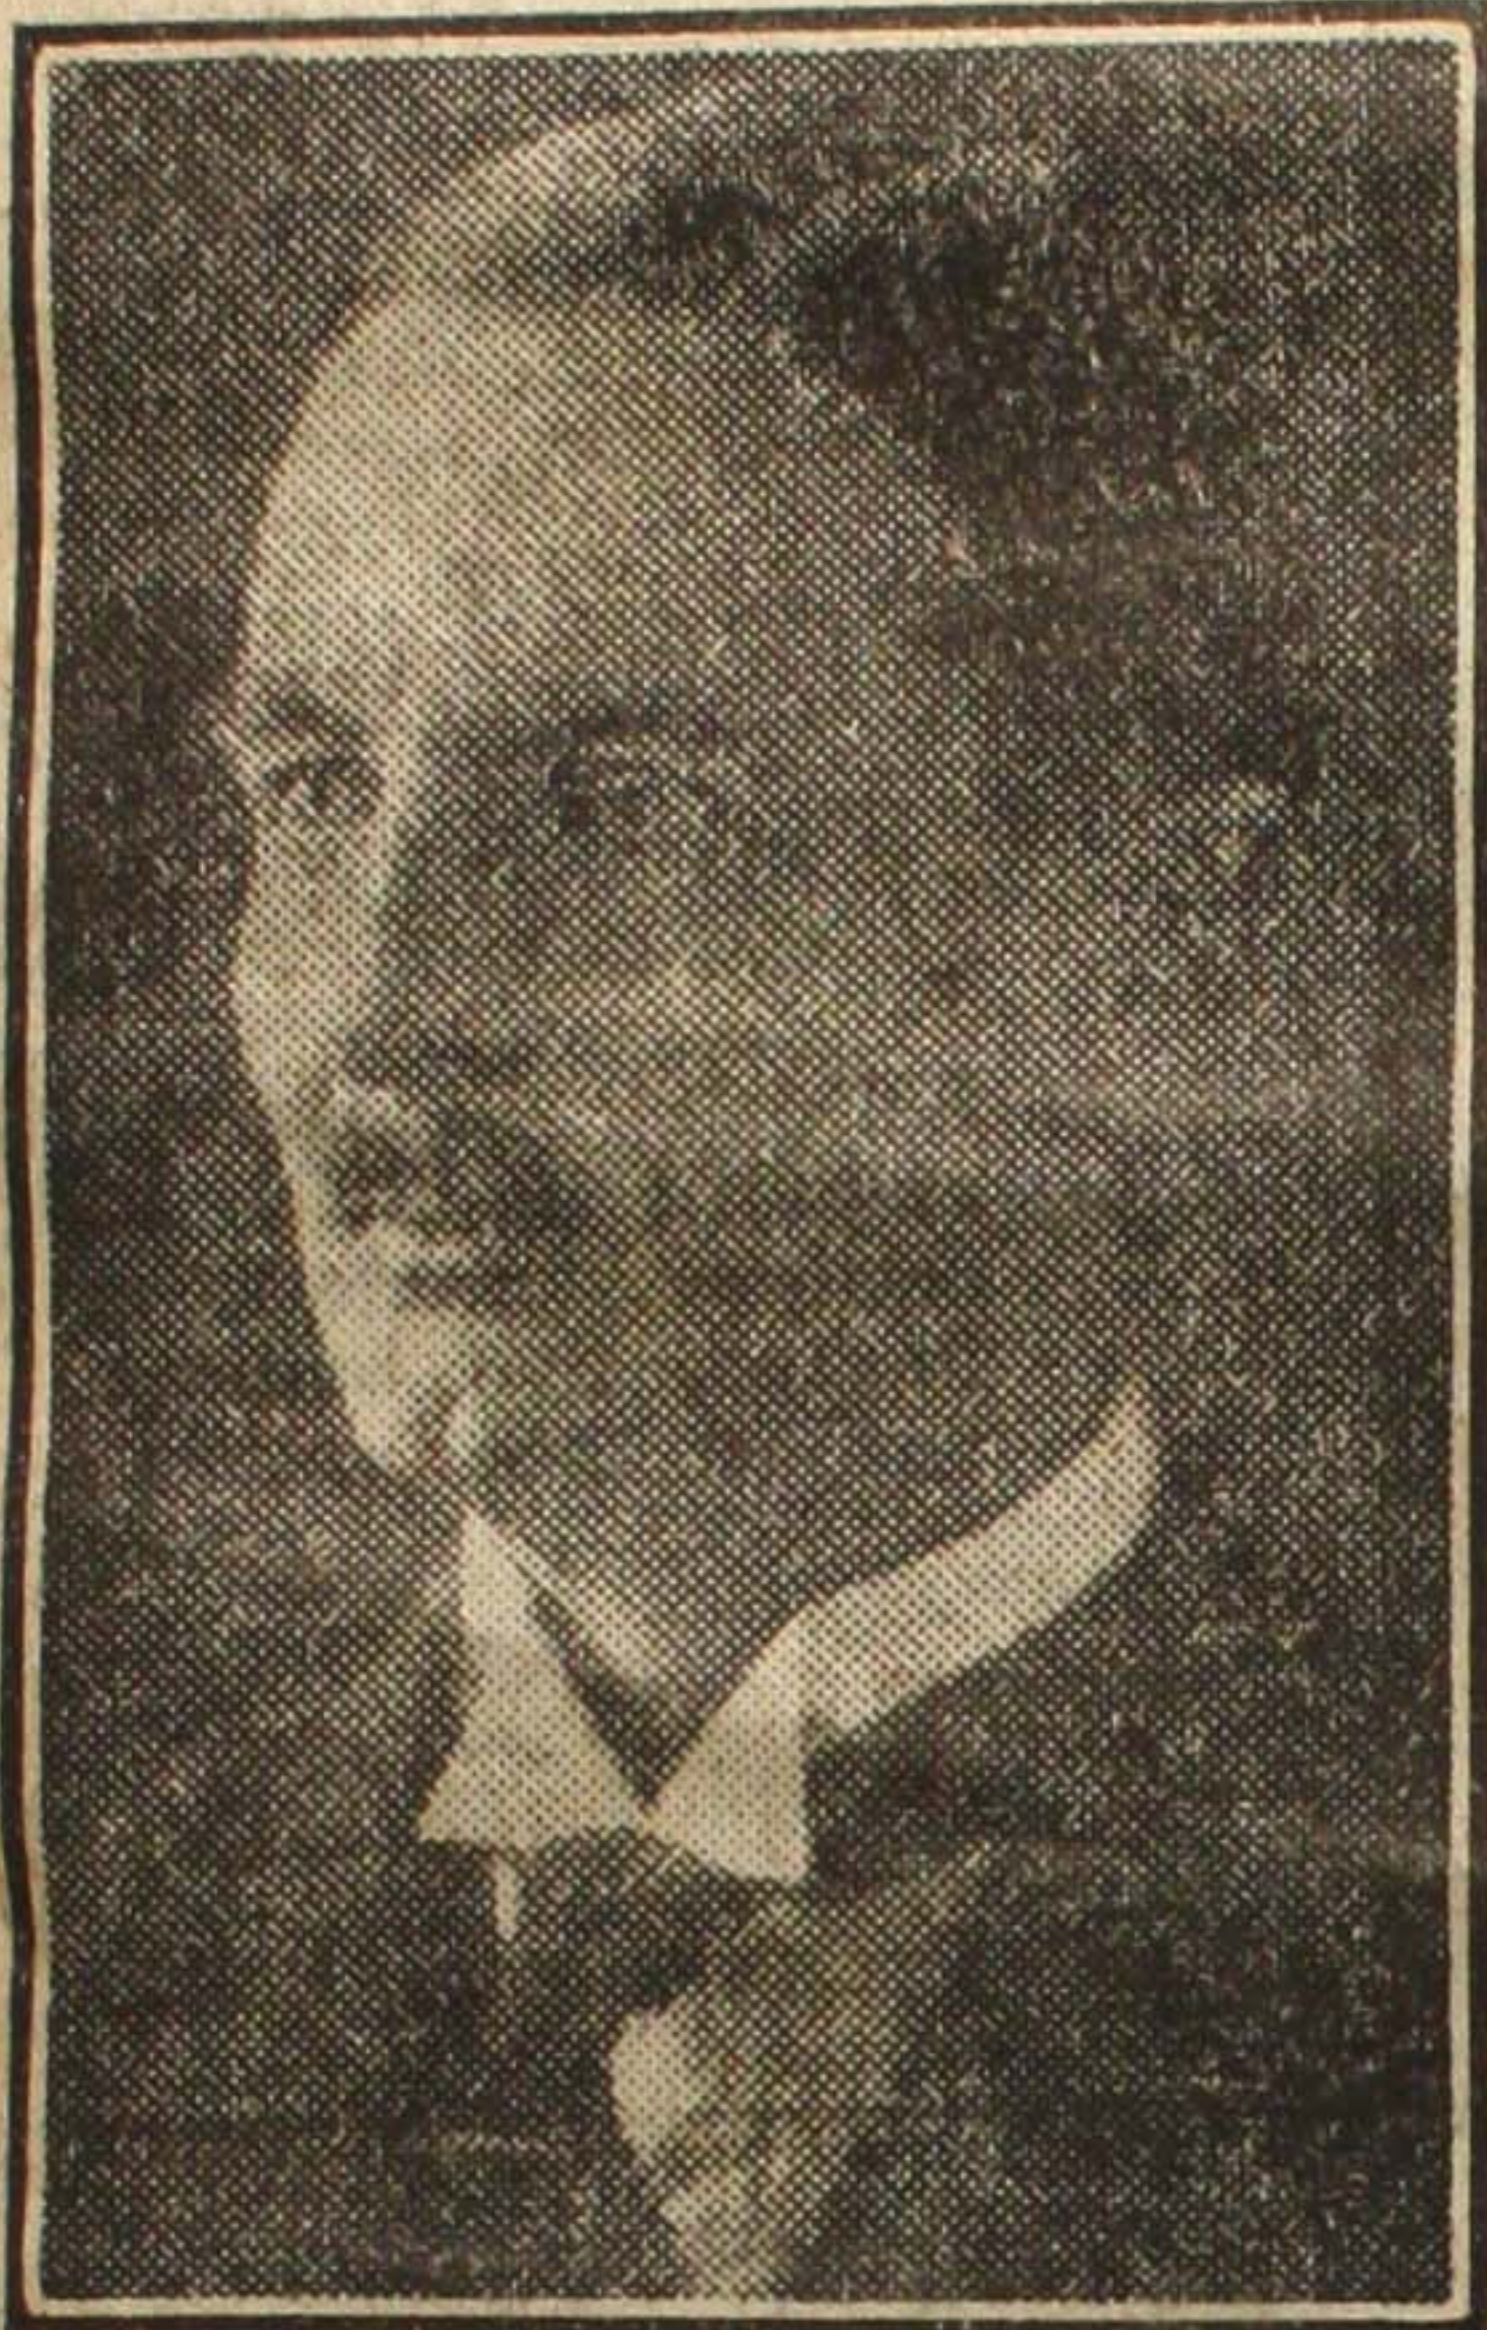

At the conclusion of the speeches, supper was served in the north hall.

REG. 25-4-28
FEDERAL GEOLOGIST.

South Australian Selected.

It was announced some time ago that the Commonwealth Government had entered into an arrangement with the Anglo-Persian Oil Company for that organization to prospect thoroughly Papua for oil. The work will be put in hand immediately. The Company will provide its own technical staff of geologists and surveyors, men who have had special experience in this class of work, but the Commonwealth Government has arranged for two skilled geologists to act in its behalf in connection with the search.

Residents of South Australia will be gratified to learn that a South Australian, Mr. Paul Samuel Hossfeld, M.Sc., is one of the two geologists selected, and he will

MR. P. S. HOSSFELD.

leave Adelaide for Canberra in the course of a few days, and after a short stay in the Federal capital will proceed to Port Moresby, where the Anglo-Persian Oil Company proposes to have its headquarters. It must be particularly gratifying to Mr. Hossfeld to know that he did not make application for the position to which he has just been appointed, but was asked if he would accept it.

Mr. Hossfeld was born at Dutton, near Truro, in 1895, and was educated at Prince Alfred College. On leaving that institution he entered the Adelaide University, where he met with many successes, and finally took his M.Sc. degree in 1926. His special bent lay in the direction of geology, and since leaving the University he has been temporarily employed in the capacity of mineralogist at the Adelaide Museum, and has also been engaged in scientific research work. For five years he was employed by the Education Department as a teacher, and was in charge of the Chinminna, Little Swamp, and Penong schools. He was also engaged in teaching at Scotch College, Torrens Park, for two years. Mr. Hossfeld is a Fellow of the Royal Society of South Australia, a foundation member of the Anthropological Society of South Australia, and a member of the Field Naturalists' Section of the Royal Society. He takes great interest in literature, and has been a member of the Magill Institute committee for a number of years. He believes in plenty of physical exercise, and founded the Magill Institute Tennis Club, of which he has long been captain. Mr. Hossfeld should make an ideal man for the position for which he has been selected, and his many friends will learn with pleasure of his appointment.

UNIVERSITY UNION BUILDING.

The fine progress being made with the Lady Symon building for the University Students' Union was referred to at the meeting of the Graduates' Association at the University on Friday night by Mr. D. H. Hollidge (secretary of the association). Reading from a report prepared by Mr. C. T. Madigan, Mr. Hollidge said that the building, refectory, and half of the cloisters were in course of construction, and would be ready for occupancy in August. The price of the contracts to cover those portions of the structure was £22,000, and the sum of £26,000 was in hand. That left a small margin for extras and furnishings. For the men's portion of the building, however, there were no funds. The appeal was temporarily in abeyance; but, on the opening of the buildings, it would be pursued with renewed vigour. The scheme had had its beginning in the Graduates' Association. Students had already contributed and promised £725.

INVESTIGATORS OF SCIENCE.

The need for a school which could provide the kind of teaching which would produce the investigators of to-morrow, was emphasized by Professor H. H. Woollard when addressing a meeting of the Graduates' Association at Elder Hall on Friday night. Scientific investigation, he said, had to go on if the race were to prosper. There were, in Australia, three medical schools which turned out competent practitioners, but no provision was made for investigators. In Adelaide, the University had special advantages for the establishment of such a school, because of its size and the beauty of its surroundings, and there was none of the riot of frenzy met with in the cities of the eastern States. It would be possible to have in Adelaide an investigatory school. Later, Mr. E. W. Holden, who presided, referred to a recent conversation he had had with the Prime Minister (Mr. Bruce), when the latter said the proposed university at Canberra would be of a post-graduate type. He (Mr. Holden), however, believed it would be better to establish such a school in Adelaide.

UNIVERSITY OF ADELAIDE.

Conferring of Degrees.

The council of the University, at its meeting on Friday last, adjourned temporarily to the mathematics lecture room for the purpose of conferring the following degrees on candidates who completed their degree or diploma courses at the March examinations:—

The Dean of the Faculty of Science (Professor Kerr Grant) presented:—

For the Degree of Master of Science.—Wood, Joseph Garnett, B.Sc. For the Honours Degree of Bachelor of Science.—Wagner, Franz William. For the Ordinary Degree of Bachelor of Science.—Bosworth, Richard Charles Leslie.

The Dean of the Faculty of Laws (Professor A. L. Campbell) presented:—

For the Degree of Bachelor of Laws.—Forgan, Frederick Robert; Kelly, Michael Lawrence; Leaver, Edward; Rochlin, Elijah.

The Dean of the Faculty of Arts (Professor W. K. Hancock) presented:—For the Diploma in Primary Education.—Westgarth, Walter Tebble, B.A.

The chairman, Board of Commercial Studies (Mr. S. Russell Booth) presented:—

For the Diploma in Commerce.—Beaney, Henry Finlay Finlay; Richardson, Jack Avon (in absentia).

MAIL 28-4-28

Sir Archibald Strong

Sir Archibald Strong, M.A., Litt.D., who delighted Adelaide St. Georgians at their festive dinner on Monday night with his speech on St. George and Empire dragons—he also spoke on Shakespeare—has been jury professor of English language and literature in the University of Adelaide since 1922. He was knighted in 1925. The professor is the author of a large number of contributions to literature. One of his latest is "A Translation of Beowulf into Modern English Rhyming Verse," with introduction and notes, published by Constable.

Sir Archibald, who is a bachelor, was born in Melbourne 52 years ago, and is a son of the late Herbert A. Strong, M.A., for many years professor of classics in the University of Melbourne, and later professor of classics at Liverpool University.

DEGREES CONFERRED

University Ceremony

The council of the University of Adelaide, at its meeting yesterday, adjourned temporarily to the mathematics lecture room to confer the following degrees on candidates who completed their degree or diploma courses at the March examinations:—

Degree of Master of Science.—Joseph Garnett Wood, B.Sc.

Honours Degree of Bachelor of Science.—Franz William Wagner.

Ordinary Degree of Bachelor of Science.—Richard Charles Leslie Bosworth.

Degree of Bachelor of Laws.—Frederick Robert Forgan, Michael Lawrence Kelly, Edward Leaver, Elijah Rochlin.

Diploma in Primary Education.—Walter Tebble Westgarth, B.A.

Diploma in Commerce.—Henry Finlay Beaney, Jack Avon Richardson (in absentia).

ADV. 30-4-28

The Council of the University, at its meeting on Friday afternoon, awarded the Bunday prize for English verse for 1928, to Mr. P. C. Greenland.

PRIZE POEM

Mr. P. C. Greenland Successful

Mr. Patrick Cecil Greenland, winner of the Bunday Prize for verse at the University of Adelaide this year, is 22 years of age.

He was educated at Gladstone, Norwood, and Adelaide High Schools, and proceeded to the university in 1924. There he read law for his first year, but ceased his studies. He has taken up work at the university again and is reading in education and psychology, with a view to graduating in arts.

Mr. Greenland is secretary of the Tor-

MR. P. C. GREENLAND

who is the seventh South Australian poet to be awarded the Bunday Prize for a poem submitted to University examiners.

rensford Golf Club, and assists in the office of Mr. C. H. Greenland (his father) at Gawler place, Adelaide.

His winning entry was a sonnet sequence of six poems.

Some years ago Miss E. Milne Bunday paid to the university £200 for the founding of an annual prize in remembrance of her parents, the late Sir Henry and Lady Bunday.

The prize, which is valued at £10, is awarded every April to the candidate who, in the opinion of the professors in letters and philosophy, has written the best poem or poems under conditions prescribed by the Faculty of Arts. There is a proviso that if the examiners do not consider any candidate worthy the prize shall not be awarded.

Previous winners of the Bunday prize are:—

1917—Mr. Leon Maxwell Gellert, whose "Songs of a Campaign" stirred Australians during the great war, and who is now associate-editor of "Art in Australia."

1921—Mr. Edward James Rañembe Morgan.

1923—Miss Thelma Evelyn Bleby.

1924—Mr. Adrian Joseph Korff.

1925—Miss Elsie Morriss.

1926—Miss Dorothy Aileen Bleby.

The prize was not awarded last year, nor in some other years as the table shows.

A POST-GRADUATE UNIVERSITY.

Speaking at a meeting of the Graduates' Association last night, Professor H. H. Woollard said there was a need for schools which could provide this kind of teaching necessary to produce the investigators of to-morrow. Scientific investigation must go on if the race was to prosper. In Australia there were three medical schools, which turned out competent practitioners, but no provision was made for investigators. Adelaide University had peculiar advantages in regard to such a school because of its size and the beauty of its surroundings. They could have an investigatory school, which need not sacrifice its competence as an ordinary medical school. The chairman (Mr. E. W. Holden) said he had recently spoken to the Prime Minister on that general subject, and he understood from Mr. Bruce that the proposed institution at Canberra would be a post-graduate University, but he (Mr. Holden) thought it would be better to establish such a school in Adelaide. He also hoped that the exhibition grounds would be available for the University soon, and that the chemistry school would benefit thereby.
