-----

O.H.M.S.

18th August, 1939.

Officer in Charge,  
Phoenix Islands Settlement Scheme,  
Island of Beru.

To The Secretary to Government,  
Gilbert & Ellice Islands Colony,  
Ocean Island.

W. & S. LTD.

I am sending, under separate cover, Secretariat Minute Papers Nos. 205/37 and 37/38 which I discovered among my own files, after His Honour's recent visit to Beru Island.

I much regret any inconvenience which may have been caused by the temporary absence of these Papers.

*J.L.H.*

No 16 of 30.9.36 E.L.L. to Act Sec to Govt.

Good Taxation Credits Ltd for 1935 & 1936 would  
have amounted to £1,328.6.3.

---

Previous subjects - Rev. Emmanuel Rungler.

Present .. His nephew - Monsieur Paul Emmanuel Rungler  
Director of C.P.C.P., Ltd.

umpster lease to Central P. Coast Plateau Ltd.

not to carry  
a sublet.

1 That the Lessees will not carry a sublet the  
first lease or any interest therein without having first  
obtained the consent thereto in writing of H 2's Principal  
S of S for the Colonies.

Receipt of land  
for public purposes

and the Valentinie further witnesseth that it is lawfully  
agreed and declared that H 2's Govt. may at any time notwithstanding  
anything contained in these presents remove and take possession of  
and occupy any land in the said Island which may be required  
for the purposes of any telegraphic cable and it may be  
required to lay through a by and under a line of other  
public purposes without paying the Lessees any compensation  
for any land so removed and occupied.

Mr J. S. Beck told E.L. could produce 600 but too enthusiastic  
without reply 357 tons h.a.

as said include fish would live very short because life of  
heart flatted area might rapidly deteriorate.

E.L.L. notes 450,000 fish of which 50% are too young to lean.  
25% might reach length i.e. about 1,000 acres.

Rainfall average 15-80 inches - particularly low. Sandy soil very porous.  
1936 rainfall 17.78 in.

area 200 sq. miles.

M.S. P.F.D. Palmer

Post production 2 cut for one.

4 Baylors

Fish flatfish. Pigs.

Amend article

Isled effectly to a federal rule as a two-Pacific base; the title, base, being established, was required for another purpose would probably be amended by the Government, to little advantage to the lessee.

1920	106	metric tonnes dry.
1921	132	
1922	105	
1923	126	Shrinkage 64% dry weight.
1924	140	
1925	155	Annual average 357 English tons.

1928	225	
1929	214	
1930	314	
1931	410	
1932	560	
1933	380	
1934	400	
1935	402	

all fisher plated - no actual growth. like F. 1. & L. 1.  
Rougher plated before to make attractively lustrous.

From the 1914 the F. Rougher took over the style of Cent. Pac. Coast  
Plating Ltd. (1) William Gray '60 of last cat.  
the (2) Messrs. Henderson & Macfarlane & the  
(3) Lewis Pacific Plating Ltd.  
Little fishery plated entirely.

1932 "Columbia" - 1922 refitted 1200 plated area, but not the same

Letter from Dr B. Fairfax-Ross to Ferguson, B. P. & Co., Ltd., 20.6.37.

Source Dr E. L. ~~W~~ report to H.C. & Mr H. Gray - visit in 1905.

Outline The roadstead is good lee to prevailing winds - exposed to westerlies  
said to be good

Area said to be 128,000 acres, but probably includes lakes & marsh.  
Area under - probably about 60,000 actual land area.

Level 87 years for 1914.

Large Lagoon etc. etc. at all points. Range of inland lakes throughout the land area  
and covered with heavy cover of white sand rising to 200 ft on N. NE  
& S. W.

Small etc. Poor & hard soil. No soil than F.1. but similar.

Planted Area 600,000 trees planted (said to be). but probably not  
more than 20% could be said to be planted today.

My note prepared for late William Gray at F.1 for planting. but H.  
Gray says only small quantity grew & growth extremely poor, restricted  
& foliage yellow.

E.L.L. says large % of trees yellowed & non-leaving while small,  
scattered areas of apparently good palms clay lagoon etc.

Probably right as a whole of white sand level on lagoon etc.  
Dead limbs remain on trees - probably due to low rainfall.

into small & imperfectly mixed.
