Agronomy Branch Report

CERTIFIED PASTURE SEED

AVERAGE YIELD PER GROWER PER PROPERTY PER YEAR

1966 - 1976

Compiled by:

J. Birrell.

Report No. 75

CERTIFIED PASTURE SEED

AVERAGE YIELD PER GROWER PER PROPERTY PER YEAR

1966 - 1976

Compiled by:

J. Birrell.

- FOREWORD -

The following tables have been compiled from official seed certification records.

The area in hectares which the grower entered for certification and which was accepted has been taken as the crop area and the amount of seed actually certified within the financial year as the total yield.

No adjustments have been made for parts of paddocks which were not harvested or seed which was reapt but not released as certified seed because no accurate records of these factors are available.

This may mean that actual farmer yields of certified and non-certified seed from certified fields may in some instances be higher than is shown.

The top six growers have been listed for each crop each year. Where a grower was top in at least one year they have been included for other years and the yield bracketed.

If no figure is shown this means no seed at all was certified.

All figures are in kg/ha.
