## Bridgland Sees Vice-Chancellor POSITION DEFINITELY IMPROVING

k the local press informed us that Mr. Bridgland had been to see the Vice-Chancellor. He found in Sir William Mitchell, who had read his "On Dit," and was therefore prepared for the visit, a ready and sympathetic listener. Here is the exclusive story of that interview.

discontent with the present lecture system of dictated notes and compulsystem of dictated notes and comput-sory lectures, and proposed that print-ed notes be used. To this the Vice-Chancellor replied that he was sure that if the students in each class approached their respective lecturers, they would be glad to receive sugges-tions and act upon them. tions, and act upon them.

The student President, sceptical since

he had heard recently of two cases where such applications had been refused, suggested that it might be better to approach the Deans of each Faculty,

and to ask them if they would consider the whole question within their respec-tive faculties, "I feel sure," replied the Vice-Chancellor, "that the Deans would be only too willing to co-operate with the students, and to put into practice any reasonable suggestions."

#### Plan of Campaign.

We thoroughly appreciate the fact that every class has different requirements, and therefore heartily approve of the proposed idea of forming a student committee to approach the Deans. It has been further suggested

Mr. Bridgland first explained student isscontent with the present lecture ystem of dictated notes and compulory lectures, and proposed that printd notes be used. To this the Vice-hancellor replied that he was sure last if the students in each class are if the students in each class in which they are particularly interested. For in some subjects printder would be glad to receive suggestions, and act upon them. value.

#### Rally All!

So far, student action has found sym-So far, student action has found sympathetic support, but the rest remains with us. First, we must go thoroughly into the vexed question of lectures with the Deans, and if that is successful, must make the most of our new opportunities. A good discussion group evolves only after practise in talking. It will be a hard, uphill pull at first to make the system work, because ever since we started our education at school we have been drilled into a certain way of thinking and acting.

The prospect is rosy. The Vice-Chancellor is with us, and the proposed

The prospect is rosy. The Vice-Chancellor is with us, and the proposed reforms have the whole-hearted support of a number of the staff. It is up to us to carry the matter to its logical conclusion. We must all do our bit, first, in working for the new system, and then in supporting it.

#### PHOENIX, ANYWAY? WHAT'S WRONG WITH

What is "Phoenix 1937" going to be ke? That is what we are all won-

What was it like in the past? Our mothers thought the first Phoenix mildly disgusting, so they told us. Our fathers dismissed us as adolescent. Graduates criticised both numbers as "precious" and very self-conscious. Others found "Phoenix 1936" a very mixed harm-ragged and marger The mixed bag—ragged and uneven. The average student scanned a few pages, murmured, "Aw, Nerts!" and sent it off to his maiden aunt as a Christmas present. The science student said, "Oh! Just the Arts crowd up to their tricks again." The History School just protested apathetically, "Oh, well! The Honors English clique seem to have collared that rag." The Philistine nudged his friend and pointed to the illustrations—anyway, three people between them did all the illustrations that were ever in Phoenix! Of course, some of the highbrows in other Universities have said nice things about the production side: "Nicely got up, and all that"—but we have not heard them say much about the standard of the stuff. Altogether, then, we gather

the stuff. Altogether, then, we gather that it was pretty widely criticised.

Was It So Bad?

But do past editors deserve the criticism they have received, and what of the criticisms which will doubtless face the new Editor? To begin with, we think that critics of the general conception upon which Phoenix is built show ignorance of the development of conception upon which Phoenix is built show ignorance of the development of similar magazines in Melbourne and Sydney. For we are moving hand-in-hand with M.U.M. and "Hermes." Anyway, those who glory in being "lowbrows" or "Philistines" can read "On Dit" or look at some of those nice Victorian pictures in the Art Gallery Victorian pictures in the Art Gallery or the illustrations in "La Vie Pari-sienne." The History School has never

done much in the shape of really worth-while articles, though Mr. Stokes courageously carried a Socratic peace campaign into Phoenix last year.

have it all their own way. All power (and contributions) to Phoenix!

#### PLEA FOR COCKROACHES

The Zoology Department wants cockroaches—as many as possible, preferably in captivity. All finders please bring them to the Darling Building-Third Floor.

REWARD HELP THE CAUSE OF SCIENCE

### MORE THOUGHTS ON THE LECTURE SYSTEM DOUBTS AND SORROWS

We are pleased at the amount of discussion and controversy which last week's issue stirred up—for it did so not before time. The overhaul is overdue, and we hope that we shall see in the future that there has been some stocktaking—personal and general—amongst those responsible for lectures and the lecture system lecture system.

We Are All in This.

We Are All in This.

Some interesting points have been raised. Most interesting of all, perhaps, is the attitude of a large number of students in the Science Faculty towards reform; they are simply left cold by the idea. Miss Wilton's letter (published elsewhere in this issue) puts an extreme but considered view: it is worth thinking over. But we happen to know that some of the most unfortunate dictation of all goes on in one or two instances in the Science Faculty. If the Science students have developed habits of mind which cause their prohabits of mind which cause their progress to be best served by dictation, then we think that they would be better if jerked out of such ways, for they are far from being the best in reality.

But that is hardly the point.

worst side of the lecture system is an evil which touches some in all faculevil which touches some in all facul-ties—the dissatisfaction is widespread. Even if the Science people are content to go on as their fathers and fore-fathers before them, they might at least look at this matter with supra-faculty vision for a moment. Surely they, too, want to see our University progress and become up-to-date wher-aver it possibly conever it possibly can.

Law and Engineering,

support has have and Engineering in particular we would appreciate something of the Kriewaldtian spirit and co-operation in the School of Mines part of the Engineering School. In so far as our students attend it, the School of Mines is a University, surely, and not a "school" in the popular sense of the term. Let the era of printed notes begin, and the age of dictation pass away. To this gradient we would appreciate something of the Kriewaldtian spirit and co-operation in the School of Mines part of the Engineering School. In so far as our students attend it, the School of Mines is a University, surely, and not a "school" in the popular sense of the term. Let the era of printed notes begin, and the age of dictation pass away. To this erd we hope the engineers will co-operate with us by opening immediate very many their lecturers. The law students are already well organised, and we feel sure that, in the face of Mr. Kriewaldt's example, the law lecturers will co-operate to humanise the processes of the law and its learning.

The Med School.

The Med School. A large measure of our support has come from the Law and Engineering Faculties—in particular we would appreciate something of the Kriewaldtian spirit and co-operation in the School

The Med School.

The Medical students are fortunate to have lecturers of the quality of Professor Hicks and Goldby. Yet there, too, others still have the dictation habit. In such subjects as obstetrics and gynaecology the Melbourne University prints what notes are required. Why not duplicated notes here on subjects where lack of textbooks make jects where lack of textbooks make notes necessary (e.g., medical zoology and bacteriology)? Two terms of lec-tures on forensic medicine, for which students have already themselves had notes printed, might well be considerably curtailed, according to senior medical people. The inadequacy of text books available forces the lecturer in biochemistry to dictate some three or four notebooks of material during one year. This is obviously a case for printed notes. First year students in Zoology and Botany tell us that in their subjects, too, copious note-taking can be relieved only by the printing of notes. The Arts Faculty.

The Arts Faculty is a problem—it sometimes seems that the average of intelligence among its students is the lowest in the University. Yet it has almost boundless possibilities if handled

sympathetically and scientifically.

To begin with, the Honors students—in some respects a race apart—are a problem in an under-staffed faculty. How are they to be dealt with? Are they to be accorded the special treatment which men like Prof. Hancock ment which men like Prot. Hancock lavished upon them, at a great sacrifice of time and energy to himself; or are they to be left to fend for themselves? In any case, many of the lectures they have recently been receiving in some schools have been rather a waste of time.

Yet these same lectures are hungrily lapped up by many of the "ordinary degree students," who have apparently not developed as well at their schools not developed as well at their schools and colleges in earlier years as the better pass and honors people. If we had larger funds, these two classes could be both provided for adequately. could be both provided for adequately; yet even now some improvement could be achieved by a little thought about the matter. Take, for example, the course known as History II.: a good school preparation should make this course passable in three weeks' work (covering text books and notes, and excluding the two terminal essays). Yet because there are no printed notes in the History School, the honors, and at least the better pass students, spend a year's note-taking on the subject. This is just an instance, not without parallels. parallels.

parallels.

Melbourne issue notes in at least Ethics, Philosophy I., History of Philosophy, English A, B, and C, French I, II., and III., Mixed Maths. II., and Pure Maths. II. (Hons.). Surely where notes are necessary (and they may not be necessary in the same subjects here as in Melbourne) they might well be typed and duplicated.

We are asking for something real and something considerable. The Vice-Chancellor says he is sure the heads of Faculties will be ready to co-operate with us. But we would be well advised to heed Miss Wilton's very pertinent letter and its warning. The advance from the staff must be met by a suitable response from us. The age of the sponge must come to an end otherwise reform will be of little use. On the other hand, we ask the staff to be patient if at first the bulk of students respond but slowly to new ways—they have to throw off the old ways, and recondition their response. condition their reflexes to the new.

[We had thought to flood the paper this week with letters, but have decided instead to summarise in the above article much of the material which has come to hand. We hope correspondents will appreciate our position and decision.—Ed.]

## DANCING!

#### MISSING! MR. THOMAS FROG

Little Tommy Tadpole began to weep and wail, For little Tommy Tadpole had lost his little tail; And his mother didn't know him as he wept upon a log, For he wasn't Tommy Tadpole, but Mr. Thomas Frog. -C. I. Dennis.

Mr. Thomas Frog is still missing. His ghost appeared at the Graduates versus Undergraduates' debate at the end of last term, but since then he has vanished into an even more impenetrable oblivion than ever before. And all we have to take his place and shoulder his responsibilities are lots and lots of dear, cheery, little Tommy Tadpoles, who are willing in their own small way, but not nearly as capable as Thomas.

At this point our thoughts soar from the primitive tadpole to that superb creation—man. In particular, we are referring to debaters in the Adelaide University. There are dozens of light, frivolous speakers, but not one good, serious debater, by which we do not mean a heavy or uninteresting talker, but one who knows his facts and can put them over to his audience.

As we have been reminded by "Vortex," last Thursday's Union Debate was an extreme example of the new spirit in 'Varsity debating. The debate was infinitely amusing, because the longer speeches were riddled with humorous and often clever interjections, and no attempt was made to bring a note of seriousness into the shorter ones. The subject was meant to be treated in a more or less serious vein; instead, it was burlesqued. Again and again there were roars of applause from the house as Mr. Joseph wittily answered back a derogatory speaker, or Mr. Amos talked on the curve of sardines.

We rejoice to see how many students are now willing and able to stand on their feet and talk in front of others, but at the same time we regret that they have nothing better to say. Adelaide's reputation among the inter-Varsity debaters is far from great, and until speakers learn to put a little more serious thought and argument into their speeches that reputation will never improve. We do not say cut out all wit. Far from it. But when you come to a debate try to find time to prepare something first, and temper your facts with wisecracks if you will.

#### FOR THEY ARE JOLLY GOOD FELLOWS

Recently the Union Secretary received £10 from the Students' Engineering Society towards the Men's Union Building Fund. We thank the engineers most sincerely for their generosity.

## ANOTHER BONNIN ACHIEVEMENT

At 4.15 p.m. last Friday afternoon a small crowd collected outside the Refectory. One was eating; one was timing; one was looking anxious; and the rest were merely amused.

It turns out that one Alan Percival Cherry bet one Lance(-lot?) Bonnin that he could not eat twelve of Mrs. Goodall's eclairs in as many minutes. Bonnin, having wanly awaited for his moral support, won the bet and astounded his onlookers by performing this amazing feat in eight and a half minutes.

We believe that this is a record, and will hold it as such unless otherwise notified.

#### ALDOUS HUXLEY, TOO!

#### On Mediaeval Survivals

"Of all the universities, Oxford and Cambridge contain the largest proportion of non-professional and merely snobbish and athletic students. But they make up for this offence by having the best supported to the offence by It is possible at Oxford and Cambridge to obtain a degree without ever attending any lectures at all. (I myself never attended more than, at the outside, two lectures a week). One is not passively taught at Oxford or Cambridge; one is encouraged to accampringe; one is encouraged to acquire knowledge actively. At most other universities, an entirely disproportionate importance is attached to lectures. Students are compelled to lectures. Students are compelled to attend innumerable courses, and it is made difficult, often impossible for a man—however intelligent or well-informed—to obtain a degree who has informed—to obtain a degree who has the members of the Aquinas Society, and in a tended these courses, and is, therefore, unable to reproduce, parrot one. All are invited.

fashion, the favorite ideas and phrases of the lecturing professor. Lecturing as a method of instruction dates from classical and mediaeval times, before the invention of printing. When books were worth their weight in gold professors had to lecture. Cheapprinting has radically changed the situation which produced the lecturer of antiquity. And yet—preposterous anomaly!—the lecturer survives and even flourishes. In all the universities of Europe his voice still drones and brays, just as it droned and brayed in brays, just as it droned and brayed in the days of Duns Scotus and Thomas Aquinas. Lecturers are as much an anachronism as had drains or tallow candles; it is high time they were got rid of."—From "Proper Studies."

#### STUNT EVENING

The Stunt Evening held last Wednesday, in the Lady Symon Hall, was an inter-faculty competition. The judges, Miss Roxy Sims and Miss Jean Gilmore, awarded the victory to the Arts students, who presented Coronation Through the Ages." In the beginning, Boadicea (H. Paine) 'Coronation Through the Ages." In the beginning, Boadicea (H. Paine) appeared with her loyal subjects singing their national anthem—the Woad song. Then came Ethelred's empty throne; William the Conqueror (J. Hewett) taking his crown from the hands of the dead Archbishop and crowning himself; King John (A. Anderson) looking for his crown in the wash accompanied by realistic Anderson) looking for his crown in the wash, accompanied by realistic washerwomen. During the Wars of the Roses, Warwick, the king-maker (R. Smith), pulled strings. Then came Cromwell (A. Anderson) with a wart on his nose—and so to George VI, when the Duke of Norfolk (J. Hewett) discussed the tragic situation with the Archbishop of Canterbury (J. Ward). The final scenes took place in a chateau in France, where a certain notorious woman (M. Higgins) sat listening to the broadcast of gins) sat listening to the broadcast of the Coronation.

The Law students gave a marvel-The Law students gave a marvel-lous rendering of a Breach of Promise Trial. G. Woodger was both the appalling plaintiff and the drunken defendant. The case depended on the fact that the plaintiff, while taking her nightly walk in Victoria Square, had asked the defendant, gently re-siding in the cannas, what the time was, to which the defendant replied, "I'm fast," and had thereupon slip-ped a ring on her finger and led her ped a ring on her finger and led her to hope for the best. The counsels were P. Frick and M. Barnes. The verdict was given in favor of the plaintiff by the judge (J. Atkins).

The Meds-and-Massage gave the lad Hatters' Tea Party (with M. Mad Hatters' Tea Party (with M. Bateman as a very superior type of dormouse) and a dramatic version of The Ancient Mariner (B. Quin Young), with much flapping by albatrosses and dying by sailors.

The Science faculty produced a Cavalcade of Scientific Discovery, written by P. Mawson, based on authentic facts, and presented with many long pauses and effective "black-outs." Early worms were dis-"black-outs." Early worms were discovered wriggling out of very early mud, and they were the beginnings of life. Archimedes (P. Yelland) tried out his principle. A piece of cheese, some straw and a trap changed into a white mouse under the magic of an early alchemist (M. McKay). Gunpowder was discovered by Roger Bacon (D. McCarthy). The state of civilisation 1,000 years hence was portrayed at a tea party, at which the guests were fed by rays, made by a very superior scientist (B. Barrien).

The Social Science students gave short scenes of sad doings in Ade-laide, entitled, "Can This Be True?"

The evening ended with supper, brilliantly organised by Lesley Bidstrup, the secretary

#### KRIEWALDT LEADS THE WAY

#### A BREAK FOR THE LAW SCHOOL

One of the first responses to our appeal for a saner lecturing system has come from Mr. M. C. Kriewaldt, Lecturer in the Law of Property. Mr. Kriewaldt has announced that he will in future supply printed notes, and use the hours he spends with his students as they should be used—in helpful discussion.

"On Dit" and the student body thank Mr. Kriewaldt for this ready cooperation, which we hope, will be the signal for a widespread, and, indeed, universal change in the right direction. We congratulate the law students on their good fortune, and ours—for what is for the good of one course is for the good of the whole University, and in that we are all interested. We are sure the Property Class will show its appreciation by making the 1937 Property results the best in living memory.

[We are withholding correspondence hich we have received from the law students, as we feel that it will soon be no longer applicable.]

#### A FAR CALL

#### UGLY WIRES TO BE REMOVED

7.30 While talking with the Vice-Chancellor last week, Mr. Bridgland suggested that the wires which obstruct the view over the Torrens by the footbridge be removed. Sir William, after an immediate tour of inspection, heartily agreed with the proposal and it is to be hoped that it will not be long before the wires are placed underground.

#### MEN'S UNION DINNER

The fourth annual Men's Union dinner was held last Saturday night at the Victoria Hotel, with Mr. N. H. Wallman presiding. It was hoped Wallman presiding. It was hoped after last year's dinner that a large number would be present, but the attendance was very disappointing. It is rather disheartening and a little puzis rather disheartening and a little puzzling as this is the only official function of this nature run by the Men's Union. Perhaps next year, when—as we were informed—the dinner is held in the new Union Building, more members will see fit to come along members will see fit to come along.

members will see fit to come along. However, for those present the dinner was a success, this being borne out by the fact that it was a little difficult at times to hear the speeches. The toast of "The Men's Union" was proposed by Mr. J. A. LaNauze, who spoke on the aims of the Men's Union and the benefit that should be derived from the completion of the new Union from the completion of the new Union Building.

We were also privileged to hearmost of us for the first time-Profesof "Our Guests." We were impressed and would like both to see and hear more of Professor Goldby, who is a distinct acquisition to our professorial ranks. ranks.

However, the highlight of the evening—with all due respects to the speakers—was the singing of Max Worthley, which was little short of excellent. He was enthusiastically received and confirmed the impression which he created by his performances. which he created by his performances in last year's revue. After listening to him the community singing, for all its heartiness, seemed rather flat.

#### BUMPING RACES

Fortune smiled upon the second car crew. They started first, because year crew. They started first, because their predecessors had won last year, stayed ahead the first night because Freshers broke a swivel, and the second night because Freshers were bumped in no time by Seniors. On the third night, however, they really aided their own victory, unbacked by mishap, kept easily ahead of the experienced Senior crew, in spite of the perienced Senior crew, in spite of the fact that J. Rupert Magarey was in it, and remained Head of the River. Perhaps fortune liked the second year faces, their stroke, McGlashan, is so fachingly handsome: or perhaps she dashingly handsome; or perhaps she objected to the confident self-sufficiency of Seniors.

Third year, who won last year as

second year, were unfortunate in having their main source of motive power, in the shape of a woolly rhinoceros—viz., F. F. Espie—only at quarter pressure. He had a cracked collar-bone, contracted, they say, in a Brisbane brawl, which prevented the use of one arm.

The composite crew, ably stroked by Maurice Finnis, and steered by Michael Quinn Young, in his oldest clothes and quite prepared for a swim, only appeared on the last night, and retained its position at the tail of the

#### THE LECTURE SYSTEM

Dear Sirs,-I am on my deathbed, so I will not waste words. About twenty years ago I attended the Adelaide Uniwas a conscientious student, versity. I was a conscientious student, and attended every lecture during my course of study. My lecture books I have since had bound, and they have heen a source of great joy to my children, who delighted in illuminating the margins of the pages with their childish stribble. scribble.

The problem which faces me is how I can best dispose of these works in my will. Can you tell me, sirs, if it would be better to hand them back would be better to hand them back to the lecturers concerned, so that they can see that the passing of time has not brought corruptions into their criginal notes; or to donate them to the Barr Smith Library for all future generations of students?

Yours in trouble, DICK TATED.

[We can vouch that the last twenty years have brought no corruptions to the lecturers' pages, and feel, dear Mr. Tated, that your bound collection of notes would be of inestimable value to students, if placed in the Library. B the way, what course did you do?-Ed.] By

Sirs,—In many cases the recent criticism of the present lecture system comes as "Welcome notes to weary bands," but not in all, for we do find some to be beneficial.

Certainly we condemn the lecture if

Certainly we condemn the lecture, if we must call it such, that for one dreary hour is loosely liberated into the atmosphere, and possibly to one or two notebooks, presenting useless material that is totally uninteresting, imparts little or no information, and makes no contribution to the ultimate end in view. For such as these—and they are not unknown—no criticism can be too severe.

Dictated notes have drawbacks, but they may also have a definite value if the quantity is not overdone, and the pace not made so hot as to render any concentration on the meaning impossible. One's own hand-written notes are read much more easily and profitably than typewritten information.

Thus, though, perhaps, not perfect, a highly satisfactory system (one employed by several of our lecturers) is that in which about one-third of the time is given to concise dictation, and the remainder of the time taken up by the lecturer, who is ever ready to answer any reasonable questions. Better again is the setting apart of the last ten minutes for discussion.

last ten minutes for discussion.

Dictated notes have the effect of guiding the student's work in a definite course, while the rest of the lecture supplies assistance to that work.

D. G. MACK.

The problem of replacing the dictation - lecture system obsolete should be regarded as an aspect of a general reformation of our educa-

One can scarcely be mistaken in anticipating that the chief question which will exercise the world in the which will exercise the world in the next half-century is that of social reconstruction. In a democracy which desires to retain its peculiar virtues, there can be only one preparation for such a situation: more education of the type that aims at a higher degree of competence in the art of finding one's own information. Only this can avert the bogey of Fascism, and only this can make possible an intelligent appreciation of the problems we are

appreciation of the prometts we are about to face.

This is not our aim at present. This University attempts to do no more than fill the professions with men of sufficient technical ability. It is thus strictly no more than a technical high school, and, curiously, feels no further responsibility towards the State to be more. We are content to produce more. We are content to produce lawyers to become statesmen, with no knowledge whatever of the potentialities of the scientific forces which are shaping society. And on the other hand, the education of the scientist leaves him indifferent to the social consequences of his own activities. The difficulties of the situation seemed to have induced a paralysis of will among the authorities.

There seems only one possible solution, which is not too revolutionary or too expensive, and that is to concentrate on producing a type of student with broad interests, accus-tomed to find for himself assimilable information on a variety of subjects. A course of reading in universal history, with particular emphasis on the history and achievements of science, should be compulsory for all students.

Present educational practices

Present educational practices achieve a diametrically opposed end. Exams, are the thing, and it is inexpedient for anyone to take an interest in matters of no examination value.
Only the lecturers' dictated notes Only the lecturers' dictated notes have examination value; broader reading and private research carry a penalty which the ambitious student cannot ignore. The abolition of the cannot ignore. The abolition of the compulsory dictated lecture and the narrow exam, it presupposes is a first step in the right direction, and it is to be hoped that the Council will grant our requests.

E. H. MERCER.

Sirs,-In your correspondence articles I have seen the blame for our bad lecture system laid upon the lec-turers or the higher powers that be, but never upon the students who most deserve it. I attend a course of lectures where the lecturer does his best—he gives us typed notes, yet half the class does not use them in lecture! He encourages discussion, but his class is dumb. And this case is not unique. How can we expect the authorities to increase our opportunities for discussion when we make practically no use of those we have.

And, Sirs, I was amazed at the number of letters on this subject whose authors were apparently either ashamed or afraid to sign their names to their effusions.

CLYVE WILTON (Science).

Sirs.—It would seem that the issuing of printed notes, and the form that his lectures shall take, are matters for the individual lecturer to decide—a point overlooked by the majority of your correspondents.

If the rules of attendance were re-laxed, it seems probable that those lecturers averse to printed notes and tutorial classes would be forced to subscribe to the system of the more pro-

gressive.

We should like to remind them of the Socratic belief that knowledge can be seemed participation only be won by personal participation in research, and cannot simply be handed on from one man to another.

Union Debate.

Dear Sirs,—Last night's Parliamentary debate was a complete washout. Apart from the speeches of Messrs. Stokes and Joseph the others were rambling, meaningless attempts to be witty. Some were but only the sort of wit a schoolboy in the very early days of adolescence enjoys. All Pardays of adolescence enjoys. All Parliamentary debates in this University must fail simply because the undergraduates are incapable of debating a serious subject seriously; until the University can do this (the Graduates set them a good example a few weeks ago), Adelaide will continue to adorn the tail of the Inter-'Varsity Debates.

VORTEX.

(We agree absolutely and accept that part of the blame which attaches to us personally.—The Eds.)

Ugh!

Sirs,— Though by nature of peaceable mind There are moments when really I find There is cause for complaint; So without more restraint My woe I will straightway unwind.

The "Karatta" has scents of its own, And the zoo is oft best left alone;

But neither, I tell,
Can e'er rival the smell
In the Lady Symon building on the
morning after the night before.

In other words, Sir, the Lady Symon building is rapidly becoming uninhabitable by reason of the curious and insidious odors which creep through it and lurk in its farthest corners.

BEFUGGED.

-:0:

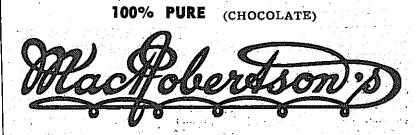

Button Day.

Sirs,—More organised blackmail! Or would it be better to say that the "button racket" had hit the 'Varsity again? This Friday every gate has its sentilely that the grand its regularly changed. and the guard is regularly changed. It is bad enough to be badgered all round town, but now, apparently, we cannot win asylum even in our own domain. There are times when the fair women of Adelaide are attractive—(we'll bite, when?—Ed.); but that is not when they fall in vivacious hordes upon the unbuttoned male.

STILL UNBUTTONED.

TOC H AND 'VARSITY MEN.

TOC H AND 'VARSITY MEN.
Toc H's attractive Australian secretary (Mr. Cowling) addressed students last Thursday at lunch time, under the auspices of the Men's Union. He told us something of the settlement work done in London during the last thirty years by Oxford men—of the difference which that work has meant to the settlers and and settled alike. Mr. Cowling thought that there was plenty of ling thought that there was plenty ling thought that there was plenty of scope here in the working class suburbs for a similar work, whether conducted through the organisation which he served or through quite independent channels. He particularly emphasised the need of young people between 14 and 20 for help, assistance and encouragement at this present time—people of our own age but of less fortunate circumstances. circumstances.

LIVELY UNION DEBATE.

With Mr. Kriewaldt as its very efficient With Mr. Kriewaldt as its very efficient Speaker, the Union held its first Parliamentary Debate last Thursday night. Both Ministers and speakers from the House are to be congratulated on the magnanimous way in which they evaded the point at issue, namely, the proposal of the Leader of the Opposition (Mr. Joseph) that "the British Government is grossly mishandling the international situation." Among the graver questions raised before the official debate opened was

Among the graver questions raised before the official debate opened was that of Mr. Bridgland, who wondered whether the Great Australian Bight was in any way connected with the high cost of foodstuffs in this country. In answering, the Minister for Public Enlightenment (Mr. Amos) declared that the problem was vitally connected with the curve of sardines, dentist bills, the specific gravity of salt water, the Ching dynasty, and the great itching in in China, and car races. Rising to flighty rhetoric, he asked: "If a piece of string weighs 4 lbs., what's the time, sir?"

Opposition Proposal.

Opposition Proposal.

Opposition Proposal.

The debate was opened by the Leader of the Opposition, who spoke at considerable length on the subject of whether or not the Foreign Secretary an imbecile. Mr. Joseph was inclined to think that the hideous moustache worn by the object of his attack was a very strong proof of his insanity worn by the object of his attack was a very strong proof of his insanity. Later, Mr. Anderson, from the House, reminded those present that the Leader of the Opposition himself has an incipient moustache. With the air of a scientist giving his invention to the world for the first time, Mr. Joseph declared: "We have not yet been able to devise anything better than the League of Nations." ("Who says so?" from the House.) "With a little more good fortune, that interjector might have been a half-wit." (Roars.) Mr. Joseph's next discovery was that the late Lord Palmerston was the last late Lord Palmerston was Prime Minister with brains Prime Minister with brains—with the exception, of course, of his colleague, Mr. Arthur Henderson. ("Mr. Arthur Henderson's dead." "A disembodied spirit," came from the House.) There was loud applause when the Leader mentioned that Mr. Henderson had been a leading spirit in the Disarmament Conference. Mr. Joseph's strong point, he asserted, was his attack on the armament manufacturers.

P.M.'s Reply. with the

P.M.'s Reply.

Amid several very rude, though well-timed interruptions from Mr. Joseph, the Prime Minister (Mr. Stokes) gave a sketch of the world as it is to-day. He was about to tell something he had read in Thursday morning's news when a shout of "Advertiser" forced him to break his train of thought, and explain that he meant news with a small n. Mr. Stokes then proposed a non-aggres-Mr. Stokes then proposed a non-aggression Pacific Pact, but was again compelled to stop by a question of "Big P or little p?" from the House. "I think I have tried to outline British policy, and that it fits to some extent with the facts," said the P.M. (Loud problems) applause.) The Scrum.

Mr. Kriewaldt then limited succeeding speakers to 41 minutes. Among

Mr. Kriewaldt then limited succeeding speakers to 41 minutes. Among these were Miss M. Richardson and Messrs. Carmen, Amos, Anderson, Bundey, Crisp, Johnson, and Geisler.

Miss Richardson (Minister for Nothing in Particular) was all for the buildog tradition. Mr. Mattison then proposed that the Mistress of the House be asked to cross the floor. Mr. Johnson, with characteristic volcanic action. be asked to cross the floor. Mr. Johnson, with characteristic volcanic action, made the sweeping statements that "We gotter get down to facts." and that "One John Bull equals five French girls, two Germans, and a dog." He satirised the Government's attempt to raise the numbers in the defence forces by increasing the rum issue to the navy, and brightening up the service. by increasing the rum issue to the navy, and brightening up the service. (Mr. Johnson here reminded us that he is not a Methodist parson). Mr. Crisp likened the opposition platform to the S.P.C.A. and said that he himself was prepared to form a Ministry, and go all out for a Bigger. Brighter, and Bonnier Empire, so that when he reached the Gate he would not be refused, as he would have done a man's work.

The motion was won by 23 votes to 15.
