Dr. R. A. Fisher,  
Galton Laboratory,  
University College,  
Gower Street,  
London, W.C.1.

Dear Fisher,

I am very gæady to cooperate in the way you suggest in providing cross references for the Archives. Such material as Williams has obtained from his light/<sup>trap</sup>would,, I think, be well worth referencing in your Archives, since it is primarily of entomological interest, and is much too voluminous to publish in full.

I will therefore get into touch with Mr Townsend, as soon as I have talked the matter over with one or two people here who are concerned.

Could you let me have Townsend's initials and address?

Yours sincerely,

*F. Yates*
