

11th February, 1954.

My dear Frank,

Thanks for supporting Goulden; I should expect his form soon. it was not included in your letter. Perhaps Irwin would like to make a third among English supporters.

I enclose a letter from a certain Dr. Rossow which seems to come from France in spite of his Charlottenburg Technical University address, and I do not see very much use for it. Would you not think that the normal probability integral would give good enough values for rankings of more than fifty? If you think the same I shall endeavour to thank him politely.

Sincerely yours,

2 encls.
