2nd January, 1953.

My dear Frank,

I am enclosing letters from Mr Grant and from a comic
American military, Chauncey, on the distribution of t, in
which matter I believe we can oblige and accomodate them
without harm.

Thank you for your note and the enclosed proposed foot-
note to paragraph 101 of the Report on the Fifth Session of
the Sub-Commission on Statistical Sampling.

It seems all right except that I do not for a moment
believe the statement in the last sentence that the refinement
proposed approximately halves the sampling variance, but perhaps
I have so much forgotten what it is all about that it really
makes sense.

        Sincerely yours,
