Professor R.A. Fisher,  
Whittingehame Lodge,  
44, Storey's Way,  
Cambridge.

Dear Fisher,

I am enclosing the paper of which I gave  
a resumé at the last meeting of the Genetical  
Society. I hope you will find it acceptable for  
Heredity.

I never acknowledged the table you sent  
me, giving the test of significance of the leading  
periodic component. I think this will be excellent  
for Statistical Tables but I feel we had better  
reserve it for the 4th edition as if we give Oliver  
and Boyd anything more it will only delay things  
once again. I am afraid they seem to be making very  
little progress at present with the Tables but I  
don't quite know what can be done about it. Had  
we known this was going to occur we ought certainly  
to have told them to do a reprint of the 2nd edition.  
The delays on this issue are quite scandalous.

Yours sincerely,

F. YATES.
