

6 July 1933.

Dr. M.A. Bailey,
10 The Parade,
Swanage,
Dorset.

Dear Bailey:

I am very glad you and Crowther have arrived at such a pretty modification of the old experiment. I can see nothing but advantage in it, except the immediate delay in getting each plot to have had the right past history. The transition programme is most ingenious. I only hope the arrangement will be stuck to long enough to give results.

Yours sincerely,
