February 24, 1930.

Dear Sir,

The Genetical Theory of Natural Selection.

Thank you for your letter of 22 February.

I am adding the Spectator and Discovery to the review list, and deleting the Journal of Genetics as you suggest. If they do review, they will no doubt apply for a copy in due course.

I have passed your suggestions regarding complimentary copies in America on to our New York Branch for their attention.

I agree that the Royal Society would be worth circularising and I will see that the other societies whose names you mentioned receive prospectuses also. I should be grateful if you could obtain a list of the Genetical Society, as you suggest.

Thank you very much indeed for your help.

Yours faithfully,

for HUMPHREY MILFORD.

D R. R. A. Fisher.
