TAHS(PUB).

Dear Sir,

The Genetical Theory of Natural Selection.

For reviews I can suggest only "Discovery" and "The Spectator", the latter being I suppose about as good for the purpose as the "New Statesman". I do not think the Journal of Genetics does reviews.

Professors of biological subjects and anthropology and psychology together with members of some societies (the lists will, of course, overlap largely) would probably catch all those immediately interested. I enclose a list of the Economic Biologists. I expect you have one of the Experimental Biologists, where I often meet Crowther. I will see if I can get a list of the Genetical Society (about 100 in all); what do you think of the Royal? It has many members who like to take an interest in general subjects outside their own province.

Yours sincerely,

ENCLOSURE.

sent: 25/ Feb/ '30*

For U.S.A., I suggest complimentary copies with a note from the author if you prefer this, for

Dr L.C. Dunn, Dept. of Zoology, Columbia University,  
New York City, U.S.A.

Dr H.H. Laughlin, Dept. of Genetics, Eugenics Record  
Office, Cold Spring Harbor, Long Island, N.Y.,  
U.S.A.

Prof. T.H. Morgan, California Institute of Technology,  
Pasadena, California, U.S.A.

Dr H.J. Muller, Dept. of Zoology, University of Texas,  
Austin, Texas, U.S.A.

Dr Raymond Pearl, Institute for Biological Research,  
Corner of Wolfe and Madison Streets,  
Baltimore, Maryland, U.S.A.

Dr E.B. Wilson, Harvard University, Dept. of Vital  
Statistics, Van Dyke Street, Boston, 17,  
Massachusetts, U.S.A.
