Dear Sir,

The Genetical Theory of Natural Selection.

I am writing to ask for your help in preparing a scheme of publicity for your book.

A prospectus of the book will be printed, and copies of it will be sent out to our Branches and Agencies throughout the world, to libraries and to individuals whose names are on our various special lists. We shall also circularize the members of the Liverpool Biological Society, the Eugenics Society and Professors of Biology. If I have omitted any Society or other body which you think should be included in the list please let me know.

I have made no provision for publicity in the United States, as this matter is left to our New York House, but I should be very glad to receive and pass on to New York any suggestions for the distribution of the prospectus or review copies over there.

Enclosed is a copy of the review list, which we propose for your book. Will you please let me know if you have any additions or deletions to suggest?

Yours faithfully,

for HUMPHREY MILFORD.

Dr. R.A. Fisher.

Sup. Milf.
