Dear Dr. Fisher,

It is very kind of you indeed, in view of your illness and the arrears which must have accumulated, to offer to glance at Nicholson and Bailey's MS. Please let me urge you to do no more than will enable you to tell us whether it is soundly conceived and likely to be valuable to workers in this field. I hope mere dipping into it will enable you to form an opinion. But I must beg you not to spend more time than you can conveniently give to the task.

The Delegates will be greatly obliged to you for looking at it, as it was their wish that you should see it, in which the non-mathematical biologists we consulted concurred.

Yours sincerely,

*Kenneth Siam*

Dr. R.A. Fisher,  
Rothemsted Experimental Station,  
Harpenden,  
Herts.
