Dear Mr Feldstein,

I have been much interested in the letters you have been good enough to send me, and although, as you recognise, the logical background is not primarily my business, I shall be much interested to follow your work in this field, and glad to receive any reprints you care to send of your publications. Meanwhile I must proceed solvens ambulando confident that any contribution worth making, will even if its implications are initially misunderstood, ultimately find a worthy place in any more logical systemat<sup>isation</sup>~~ies~~ of the subject.

Yours sincerely,
