

October 5, 1942

My dear Henry,

As you will be giving us the arrangements for the joint meeting with the Entomological, I think you must fix a day for the Committee at which you can almost certainly be present. I do not think having it early is so important as that. Anyway, if you can come over on the 10th we shall be able to see Hather on the 11th, so as to make any remaining points clear.

Send me a line to confirm your coming, and an indication of time of arrival, for if you could come early on Saturday I should like to meet you at Harpenden rather than St Albans' station. That afternoon I am demonstrating short-tailed mice to a N.E.A. party, and it would give them an extra thrill if you were able to be there.

Yours sincerely,
