

February 12, 1941

My dear Henry,

Thanks for your note. I am very glad to hear that we may expect you this week-end, as we had hoped.

I have just discovered that I am this year President of the Genetical Society, and, as I should hate that the Society should cease to function merely on this account - or because the secretaries neglected to tell me what had been done - we ought to discuss what activities of the Society are now urgently necessary.

Looking forward to seeing you,

Yours sincerely,
