

BOMBERSTOWN  
SHIRT

20 WOODSTOCK CLOSE,  
OXFORD.

February 23<sup>rd</sup> 1935.

My dear Fisher,

I am coming up to London on Wednesday to dine with the Provost of University College to meet Professor Heige - an invitation which I am sure I owe to your kindness! It will be very interesting to meet him, and I shall be so pleased to see you. I hope we shall get the chance of a few minutes talk. I have got some rather cursory information on the polytropism of lepidoptera larvae, and should very

much like to discuss it with you.

I had hoped to come  
up before, but it has been rather  
difficult to get away this term.  
I am looking forward to hearing  
your account of polydactyly at the  
Linnæan Society on March 7<sup>th</sup>.  
Many thanks for the reports. I am  
so glad to have them.

Yours sincerely,  
L. B. Ford
