My Dear Fisher

WOODS HOLE, MASS.

Some time ago I saw that the Grant to the Annals of Eugenics was to be considered (from the minutes) and I wrote a strong letter in support of the continuation. The recent minutes recording your resignation from the Council perhaps indicates that the Grant has been discontinued. I am sorry if that is the case, but there were evidently certain elements out to terminate it. I am hard at work on a new book on Human Genetics. Glad the bombing is off for a long period.

Yours ever R. K. M. Gato
