

1st May, 1959

Mr. E. Irving,  
Department of Geology,  
Box 4, G.P.O.,  
CANBERRA, A.C.T.

My dear Ted,

We shall not be long in Canberra but I should not like to miss talking to you and making the acquaintance of your wife. There is a ceremonial Dinner on 6th, but we are free in the evening of 7th and, for aught I know, on 5th when we shall arrive, no doubt exhausted and at an uncertain hour. I should say the 7th, if that is a free evening for you and I hope you will have a great deal to tell me about the geology of this Continent. We have been admiring, but very ignorantly, the masses of Precambrian material behind Adelaide.

Sincerely yours,

R. A. Fisher
