Professor Sir R. A. Fisher,
Department of Genetics,
Storey's Way,
CAMBRIDGE, U.K.

Dear Sir Ronald,

Thank you very much for your letter of March 19th and for writing to Carnegie for me. I have not had an answer from them yet.

It is unfortunate that you are to be away from Cambridge when I pass through in late September. However, I shall be in Newcastle with Keith until the end of the year before returning to Australia and can easily come and see you in Cambridge after your return from the States.

The pole curve for Australia is now ready in outline. It passes down the North Atlantic, through the Sahara (!) and reaches Cape Town by Cambrian times. It is quite different from the curves from Europe and America.

With kind regards,
Yours sincerely,

E. Irving
