

July 19, 1937

Dear Irwin,

I have recently acquired Oskar Anderson's "Einführung in die mathematische Statistik" for the library here. As it has some importance as the first book, I believe, in German which contains much about modern methods, I wondered if you would care to do a review of it for the Annals. I cannot, however, offer you the volume for so doing, though, of course, I will lend you our copy.

Yours sincerely,

Dr. James Cook has this book July 20 or 21  
1937
