

25th March, 1957.

Dear Tage,

Thank you for your co-operative letter. There are always difficulties in detail in statistical enquiries, but the enclosed form of questionnaire explores most of these. I should hope, and expect, that nearly all males would fall in three main classes, non-smoker, cigarette smoker, and pipe smoker, or perhaps cigar smoker according to country, whereas women would mostly be cigarette smokers; however, I have seen some very nice women smoking cigars in Denmark!

Sincerely yours,

Enc.
