CAMBRIDGE.

27th October, 1952.

My dear Oscar,

I am glad to have your letter and to put your name on my mailing list. The fact is I have not been publishing much in recent years on the nature of serious statistical methodology, but have principally been concerned with practical experimental details in genetic research. However, whenever I conceive that what I have written might interest you, I will have it sent.

Thanks for your note about Lush. I think we recognise the same situation quite clearly.

Sincerely yours,
