Dear Kendall,

Thanks for your letter and your paper on k-statistics. Your operator \mathfrak{h} seems to be extremely useful, though I am afraid I have not yet sufficiently fathomed its action. I should certainly be glad to include your paper in the number of the Annals which I am at present filling up.

I shall be a great deal interested to hear what further progress you make, as I am sure that some comparatively simple analytical approach should be possible.

Yours sincerely,
