

15 January 1934.

Dr. W.M. Malisoff,  
128 South 49th. Street,  
Philadelphia,  
Pa., U.S.A.

Dear Dr. Malisoff:

I have to-day received 30 reprints of my paper on Indeterminism and Natural Selection, from the Philosophy of Science.

First let me congratulate you on the publication of the initial number, and judging from the reprint, on the appearance of the journal as a whole.

I should have valued the opportunity, had it been possible, of seeing a proof of the article, as this would have given me the chance of correcting a few small errors that have crept in and also of ordering a number of reprints for distribution. Will you let me know if I could purchase an extra 100 copies of the article, as it will certainly do no harm to call the attention of people on my mailing list, to the existence of your journal.

Yours sincerely,
