Telephone LIBerty 3645

Fourteenth,
June,
1948

Dear Professor,

Many thanks for looking through my paper on Extinction Times. I am glad that you thought it useful and I am also indebted to you for pointing out the connexion between my constant for the ~~informative value~~ ^{most} of p and the constant you found in "The Design of Experiments". I am ashamed to say that I had quite missed the connexion.

I had not really considered where to send my paper but I think your suggestion of "Biometrics" is a most appropriate one.

You will be ~~particularly~~ ^{perhaps} interested to hear that my appointment at Birmingham is now final. I am much indebted to you for your interest in my application and for your help as a referee.

Yours sincerely,

Kenneth Mather
