

April 15, 1940

Dear Mather,

I have your invitation to give a talk and demonstration for the Genetical Society's meeting, June 14th & 15th. One thing that I could deal with very briefly is an erroneous formula in general selection theory, which has been repeatedly put forward by Sewall Wright, and which he makes the basis of discussion in his recent book on the new systematics.

Title: On Wright's formula ^{of Natural} ~~in~~ general selection -
no apparatus - no lantern.

Yours sincerely,
