

---

31st May, 1956.

My dear Lawrence,

Thanks for your letter and the Ph.D. summary you enclose, which latter I am returning with a query on an obscurity in the middle of section (c) of the summary.

It will be delightful to see you and Alison, and I hope you will both be free to dine as our guests, unless you have made other arrangements.

Fairly recently Healy at Rothamsted has been running out some statistical tables for me on their electronic machine.

*The problem is one of multiple entry like yours of the Mean.*

Sincerely yours,

Enc.
