

2nd January 1934,

Dr. W.S. Pearson,
Trevisson,
Flushing,
Falmouth.

Dear Pearson,

I had the circular about Annals of Mathematical Statistics, signed the form and sent it in. This was probably very rash, as you might have done the same, and then we should have two copies at least for the next year. I would not mind personally, but probably the right plan is to have one between us, in which case my guarantee can stand without taking any further steps. We might, however, give them a help in getting libraries over here to take it in, certainly the Statistical Society and the Mathematical Society ought to do so.

Wont' you come and lunch with me sometimes, as that does not mean even my staying late in town.

Yours sincerely,
