

13 July 1933.

Dr. E.S. Pearson,
.. Biometric Laboratory
University College,
Gower Street,
London, W.C. 1.

Dear Pearson:

I should certainly like to help as a matter of general policy, in your joint lecture course. I know, however, very little about what the would interest the Students you have in mind, and should rather leave my contribution unspecified until I know more what is wanted. The "course" will be necessarily scrappy, but you certainly ought to contribute. I am sending the draft for the Calendar herewith.

Yours sincerely,
