

13 March 1933.

Prof. S.B. Poulton, F.R.S.,  
Wykeham House,  
Oxford.

Dear Professor Poulton:

I believe I have left unanswered your post card of 27 February 1933. I am very anxious to get a full account of the discussion even if it makes the offprints cost a little more as the value and interest of the offprints will depend greatly on the amount of biological material included. I am writing to Neave to ascertain how much 100 offprints of the whole 25 pages are going to cost.

Yours sincerely,
