Ninth 1928

Dear Dr Richey,

I am sending under separate cover a sample of reprints of the more agronomic sort. The more important ones on Statistical Method are referred to in my book. I am glad to hear you have taken to randomisation, the security it gives to one's estimate of error is worth a lot. The same sequence ought to be allowed to occur as often as it will by chance.

Yours sincerely,

Dr F.D. Richey,
