

3 June 1943

my dear Salisbury,

It is very kind of you to send me your note of good wishes for my new appointment. I hope, when I get established there, that you will come and visit me, as I suspect that contact between ecological and genetic studies is likely to be fruitful in Botany as it has already been in Zoology. For a while, however, I shall certainly have nothing to show; there never was such a tabula rasa.

Yours sincerely,

*Sincere writing this I have, just heard about & Kaw. Sipland! I should be happy to see you for all sort of chit. of things. so well*
