

22nd. September, 1942.

my dear Salisbury.

I was extremely glad to receive this morning your book on "The Reproductive Capacity of Plants" . I do think you are to be congratulated on having accumulated for so many plants comparable data on the size and numbers of seeds produced, and this from a variety of habitats.

I can dimly realise how much work this has meant in all, and it is a real pleasure to see it all collected in a permanent form.

Yours sincerely,
