

September 23, 1941

Dear Taylor,

I have just had a line from Fraser Roberts, who hopes to visit Harpenden at the week-end of October 5th. I wonder if you would find it possible to drive over and have lunch with us that day, taking the opportunity of seeing him and discussing his data. He has, I believe, just finished about 40,000 of the Bristol area, but there is another big batch in sight, though rather less accessible to him.

I have had nothing yet from Mills or Wrigley. Wrigley proposes to enumerate his data by sex and age, and Mills to send us a duplicate card index.

Yours sincerely,
