

May 27, 1941

Dear Taylor,

If you are bringing Race over to the Genetical Meeting, June 19th, I wonder if you will bring him in to lunch at our house. One way and another, there may be a trifle of bother about finding lunches in our Harpenden pubs.

We have been counting some Leeds data of late, which has a new feature to us in the ages of the donors. The sheet enclosed may interest you. What do you make of it?

Yours sincerely,
