Dear Race,

thanks

Many/for the first Cambridge 1000 divided by sex. The association of femaleness with A_2 does exceed its S.D. in a ratio about 2.1, so I should put it in the class of phenomena in which one would be interested if it turned up again.

I have now received Janet Vaughan's big collection, but have not yet sorted them. Can you and Taylor make any sense of the Glasgow data?

Yours sincerely,
