

5th April, 1935

Dr. G.L.Taylor  
Department of Pathology,  
University of Cambridge

.My dear Taylor.

Many thanks for the offprint which I was so glad to see when it appeared in "Nature."

I have not heard direct from the Rockefeller Foundation, but I understand from the Provost here that the scheme, practically as I drew it up, is likely to be adopted. It will be administered, not by the College, but by the Medical Research Council. I may, therefore, have more definite news fairly soon.

Yours sincerely,
