

31 March 1931.

Dr Olof Tedin,
Weibullsholm,
Landskrona,
Sweden.

Dear Tedin,

Many thanks for the fine body of data which I received to-day. I expect you will have already decided to work the means for the segregate classes separately in each family, so I am proposing in the first instance to work only with the frequency distribution of each F_3 family as a whole.

I am very much obliged for the opportunity to work over such a fine lot of data, and will keep you in touch with any progress we may make.

Yours sincerely,
