

8th. March 1947.

My dear Gerard,

I was glad to have your letter. I am sure your judgement would be better than mine as to where to place Jones' and Mollison's paper. Perhaps it does not bring out anything of sufficiently general interest for the Proceedings, though I should myself be glad to see it there.

When are you going to pay me a visit? I shall be here fairly

continuously during the Spring and Summer, though I expect to make a short visit to the States in September.

Your's sincerely,
