

September 9, 1938

Dear Professor van Uven,

Many thanks for your letter of September 7th introducing Dr J.J. Hoogland. If you are in touch with him I should be glad if you will let him know that I shall be happy to receive him at the Galton Laboratory and to put the facilities of the Laboratory at his disposal. I am expecting also during the Autumn another Dutchman, Dr Fortuyn, who has been working previously in China. I hope they may come to know each other.

Yours sincerely,
