

October 1933.

A.E. Watkins Esq.,
School of Agriculture,
Cambridge,

Dear Watkins,

I do not think I have had a notice of the Genetical Society meeting, but I suppose it is at the Linnean. Anyhow, I hope I may see you that afternoon, and talk over the points you have in mind, though I confess I do not know in the least as yet, to what part of the book you are referring. It might help, as I have a very bad memory, if you could give me a clue to this in advance.

Yours sincerely,
