

19 June 1933.

Dr. J. Wishart, F.R.S.S.,
School of Agriculture,
CAMBRIDGE.

Dear Wishart:

I am sorry the Natural logs. were not returned, as was my intention, with the last letter. I am sending them now.

Of course I shall be delighted to see Bartlett. Tell him to come whenever it is convenient to him. I shall be in Cambridge on the 21st. and probably also on the 22nd. on wheat sampling work. Otherwise he could catch me most days in the near future, though I shall be away more later.

I had wondered if you had used the true differences, but got an impression that the deviations were mostly in one direction. I do not think the point matters so long as you can make clear just what the differences you have used are.

Yours sincerely,
