

BIOLOGICAL RESPONSE TO CORTICOTOMY-ASSISTED ORTHODONTICS

A thesis submitted in partial fulfilment of the requirements for the degree of
Doctor of Clinical Dentistry (Orthodontics)

by

Dr Cherry ZAW
BDS (Hons), FRACDS

THE UNIVERSITY
of ADELAIDE

Orthodontic Unit
School of Dentistry
Faculty of Health Sciences
The University of Adelaide

2013

Literature Review List of Figures

Figure 1: Graphical illustration of bone biological reaction to variation in strain value ⁴⁸	25
Figure 2: A theoretical model of tooth movement ⁵⁰	27
Figure 3: Schematic drawing of a tooth, the periodontal ligament with cells and alveolar bone ⁵⁰	28
Figure 4: Accelerated Osteogenic Orthodontics technique ⁹⁵	37
Figure 5: Osteocytic osteolysis within trabecular lamellar bone ⁹⁵	38
Figure 6: Osteocytic osteolysis within trabecular lamellar bone showing cutting cone and secondary osteon formation ⁹⁵	39
Figure 7: Diagrammatic comparison of steady state vs. RAP induced bone resorption with hypertrophied osteocytes and increased number of osteoclasts ⁹⁵	39
Figure 8: Intrusion of a lower molar ¹⁰⁷	44
Figure 9: Surgical procedure of corticotomy-assisted expansion ¹¹¹	45
Figure 10: Case 1 clinical photos from Hassan et al. ¹¹¹	46
Figure 11: Case 2 clinical photos from Hassan et al. ¹¹¹	46
Figure 12: Wilcko case report ⁹⁴	48
Figure 13: Schematic illustration of speedy orthodontics ¹¹⁴	51
Figure 14: Flap design with cortical perforations from Aboul-Ela et al. ¹¹⁵	52
Figure 15: Clinical photos of treatment outcome from Aboul-Ela et al. ¹¹⁵	52

Article 1 List of Figures

Figure 1: Experimental timeline	82
Figure 2: Appliance design	84
Figure 3: The region of interest of a single, sample tomographic slice.....	88
Figure 4: Points of measurement between the CEJ and alveolar crest.....	90
Figure 5: Graph showing the inter-scan differences of the same hydroxyapatite standards	92
Figure 6: A sample MicroCT slice	93
Figure 7: Reconstruction image showing the buccal plate in relation to the sample	93
Figure 8: Sample reconstruction images of the buccal plate of bone	94
Figure 9: Graph comparing the left side (control) with the right side (test) in relation to mean bone mineral density	96
Figure 10: Graph comparing the left side (control) with the right side (test) in relation to mean BV/TV	99
Figure 11: Graphs comparing the mean bone fraction of the treatment groups	100

Article 1 List of Tables

Table 1: Study groups	83
Table 2: Comparison of left side (control) and right side (test) in relation to mean bone mineral density	96
Table 3: P-values when comparing right side (test) groups in relation to mean bone mineral density	97
Table 4: Comparison of left side (control) and right side (test) in relation to mean BV/TV	98

Article 2 List of Figures

Figure 1: Experimental timeline	120
Figure 2: Appliance design	123
Figure 3: Determining the region of interest	126
Figure 4: The region of interest (palatal region of bone).....	127
Figure 5: Variation between scans of the hydroxyapatite standard block	129
Figure 6: Sample reconstruction images of the palatal plate of bone from the untreated control side.....	130
Figure 7: Sample reconstruction images of the palatal plate of bone from the test side.....	131
Figure 8: Graph comparing the left side (control) with the right side (test) in relation to mean bone mineral density	132
Figure 9: Graph comparing the left side (control) with the right side (test) in relation to mean BV/TV	133

Article 2 List of Tables

Table 1: Study groups	121
Table 2- Comparison of left side (control) and right side (test) in relation to mean bone fraction.....	133
Table 3- P-values when comparing the left side (control) groups in relation to mean bone fraction.....	134
Table 4- P-values when comparing the right side (test) groups in relation to mean bone fraction.....	135

2. ACKNOWLEDGEMENTS

I would like to express my gratitude to my supervisors, Professor Wayne Sampson, Associate Professor Craig Dreyer, Dr Ian Parkinson, and Professor Peter Bartold for their valuable guidance, critical appraisal, intellectual input, and great support throughout the project.

Thanks to Dr Mun Jong for his organisation and surgical participation.

Thanks to Thomas Sullivan for his statistical analysis and guidance relating to data analysis.

Thanks to Ms Lena Truong and Ms Helen Tsangari for laboratory assistance.

Thanks to Gunz, GAC and 3M for their generous donation of materials used in the study.

Thanks to Mr Eddie Sziller and Mr Jon Cord-Udy for laboratory technical assistance, including appliance fabrication.

Thanks to the staff of the Animal House for their assistance and support.

Thanks to the Australian Orthodontic Society Research Foundation for their funding support.

Thanks to Dr Trudy Stewart, Dr Wee Han Tan, Dr Danny Ho, and Dr Berna Kim for their assistance in animal handling, informal support, and encouragement.

I would also like to acknowledge my family for their constant support and in particular my husband, Danny, without whose encouragement, patience, and editing assistance, I would not have finished this project.

3. SIGNED STATEMENT

This report contains no new material that has been accepted for the award of any other degree or diploma in any other university. To the best of my knowledge and belief, it contains no material previously published except where due reference is made in the text. I certify that no part of this work will, in the future, be used in a submission for any other degree or diploma in any university or other tertiary institution without the prior approval of the University of Adelaide and where applicable, any partner institution responsible for the joint-award of this degree.

I give consent for this copy of my thesis, when deposited in the University library, to be made available for loan and photocopying, subject to the provisions of the Copyright Act 1968. I also give permission for the digital version of my thesis to be made available on the web, via the University's digital research repository, the Library catalogue and also through web search engines, unless permission has been granted by the University to restrict access for a period of time.
