

The Geology of the Walparuta and Ethudna Mine Areas,  
Olary Province, South Australia.

Submitted by J.D. Waterhouse, Department of Geology,  
University of Adelaide.

October, 1971

# INDEX

	Page
Background	1
Introduction	1
PART ONE - UALPARUTA MINE AREA	
Field mapping	2
Lithologies	3
A. Layered Quartzo-felspathic rocks	3
Marker beds	6
B. Schistose rocks	7
C. Banded gneisses	8
Intrusive granites	8
Origin of the Layering	9
Structure	10
Faulting	13
Metamorphic History	13A
Mineralization	14
PART TWO - ETHIUDNA MINE AREA	
Field mapping	16
Lithologies	
A. Massive granite	16
B. Layered felspathic rocks	17
C. Marker beds	17
Intrusive dykes	18
The Origin of the Layering	18
Structure	19
Marker beds and their relation to Overall Structure	20
Metamorphic History	21
Mineralization	22
Origin of the Mineralization	22
Conclusions	23
Acknowledgements	24
References Cited	25
Appendices (A,B,C,D)
